Goldtouch

KOV-USB6T-CC

6ft USB-C to USB-C Cable

The KOV-USB6T-CC provides a simple, convenient solution without the need for adapters.

Many newer USB-C devices still ship with standard USB-C to USB-A cables. This optional accessory provides a seamless alternative when your computer, laptop, or wall charger utilizes only USB-C ports.

This 6-foot length cable provides additional flexibility for desktop setups, workstations, and other configurations where a standard-length cable may not reach. This cable will work for any USB-C devices, not limited to Goldtouch products, including for charging or data transfer.
